**MODEL BUILDING METHODOLOGY  
DEPARTMENTS OF SUBJECTS OF NATURE MANAGEMENT**

Let the ecological-economic system S consist of a control system (CS) and a controlled process (PM), then:

$$S = \{CY, VII, u, p, f(t)\}(\text{one})$$

where u are control actions; p – information about the current state of the controlled process; f(t) – disturbing influences. We assume that the function of the control system is to develop controls u that lead to a minimum deviation dP of the controlled process from a given target state ...
